

# Calculator

## Web Application

**Created By: Vansh Raina**

**Roll No: 2300290100278**

**CSE 3D**

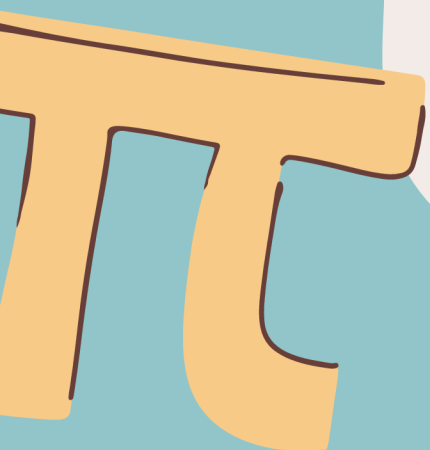

# Introduction

**Objective:** Create a simple calculator using HTML, CSS, and Javascript.

**Components:**

- HTML for structure.
- CSS for styling.
- Javascript for functionality.

# HTML

## HTML Overview:

- Contain the basic structure for the calculator.
- Include a display area and buttons for numbers and operations.

## CSS Structure:

- Styles the calculator, display and buttons.
- Adds colors, spacing, and hover effects.

## JS Functionality:

- Functions to append values, clear display, and calculate results.
- Handles user interactions with the calculator.

# Conclusion

- **Created a simple calculator using HTML, CSS and Javascript.**
- **Covered the structure, styling and functionality.**
